

Gowtam R E

AI/Machine Learning

✉ regowtam@gmail.com ☎ +91-7904114369 📍 Chennai 🔗 [Linkedn](#) 🐙 [Github](#)

SUMMARY

Motivated and detail-oriented fresher with intermediate knowledge in Python, Java, HTML5, and CSS3, along with hands-on exposure to Machine Learning and Digital Image Processing concepts. Familiar with libraries such as Scikit-learn, OpenCV, NumPy, and Matplotlib for data analysis and model development. Possess basic front-end development skills and experience using tools like VS Code, PyCharm, Jupyter Notebook, and GitHub. Eager to contribute technical, analytical, and problem-solving skills in a growth-oriented environment.

PROFESSIONAL EXPERIENCE

Lenovo India Pvt. Ltd(Internship), 06/2025 | Pondicherry
Production & Quality Control Associate

- Gained hands-on experience in assembling and testing laptops and desktop PCs.
- Collaborated with hardware teams to ensure quality control, system functionality, and performance standards during the production process

Pluto Academy, AI/ML Internship

- Developed a Movie Recommendation System using Machine Learning for personalized content suggestions.
- Built a Heart Disease Prediction System using predictive analytics and classification algorithms.
- Worked on data preprocessing, model training, evaluation, and deployment using Python and Machine Learning tools.

EDUCATION

B S Abdur Rahman Crescent Institute Science And Technology, 06/2023 – 06/2026 | Chennai
Bachelor Of Computer Science In Artificial Intelligence,

SKILLS

Programming Skills: (Python, Java, HTML5, CSS3) | **Machine Learning & AI Libraries:** (Scikit-learn , OpenCV, NumPy, Matplotlib) | **Development Tools & IDEs:** (Visual Studio Code, PyCharm, Jupyter Notebook, Google Colab) | **Database & Version Control:** (MySQL (Basic), Git, GitHub) | **Core Concepts** (Machine Learning, Data Preprocessing, Data Visualization, Digital Image Processing) | **Tools** (Git, GitHub)

PROJECTS

SolarTrack Pro – ESP32 Dual-Axis Solar Tracker

Developed a full-stack IoT-based solar tracking system using ESP32, React, Node.js, MongoDB, and FastAPI, featuring real-time monitoring, historical analytics, machine learning-based angle prediction, and automated dual-axis control.

Wastewater Treatment DashBoard

Developed a real-time IoT dashboard using ESP32, Node.js, and WebSockets to monitor wastewater quality (pH, turbidity, temperature) with a Random Forest ML classifier for automated water treatment classification and live actuator control.

MedAI – AI-Powered Clinical Recommendation System

- Developed a healthcare management platform using **Python, FastAPI, and SQLite** with AI-based medicine recommendations and patient risk analysis.
- Implemented patient management, prescription tracking, clinical record management, and RESTful APIs for healthcare workflows.
- Built intelligent recommendation and predictive analytics modules to support clinical decision-making.

CERTIFICATES

Oracle Certified Foundations Associate – Oracle University |
Artificial Intelligence Fundamentals – IBM SkillBuild |
Project Management Fundamentals – IBM SkillBuild |
Web Development Fundamentals – IBM SkillBuild |
HTML/CSS Essentials 2025 – Cisco Networking Academy | ESP32 for IoT – Udemy
